

Job opportunity

Field Assistant Manager

JatroSolutions is an internationally operating company dedicated to improving the genetics and the economy of *Jatropha curcas* L. Our focus is the development of superior jatropha cultivars and consultancy on the whole jatropha value chain. Our global field trial network represents an essential component of the jatropha breeding program.

We are looking for a field assistant manager for our affiliate in Cameroon with the following responsibilities:

- Coordination of the agronomic management of the edible jatropha field site in Batchenga, Cameroon.
- Provide training, coordinate and supervise local staff members.
- Optimization and supervision of data collection procedures.
- Management and quality control of seed storage.
- Management of post-harvest facilities to ensure food quality and safety control.
- Instruction and motivation of technical staff.
- Contribution and adherence to budget plans.
- Monthly reporting to Project Manager and Management Assistant in Germany.

Applicants should have the following qualifications:

- Native French speaker.
- Fluent English is mandatory in order to communicate with local and international team members.
- Academic degree in agronomy.
- Hand-on experience in field work and agronomic field management. Motivation to work in the field.
- Strong data management skills and relevant IT knowledge.
- Excellent communication, organization and coordination skills.
- Multicultural sensitivity and awareness.
- Commitment to continuous learning and self improvement.
- Commitment to proactive and responsible behavior.

The position will be located in Batchenga (Cameroon), with occasional traveling for organizational purposes. The position is established for a fixed-term of 2 years with possibility of extension.

If you feel addressed, please send your application as one pdf file (including letter of motivation, CV, certificates, references) until 01.03.2018 to office@jatro solutions.com.
