Internship opportunity

JatroSolutions is an internationally operating company dedicated to improving the genetics and the economy of *Jatropha curcas* L. Our focus is the development of superior jatropha cultivars and consultancy on the whole jatropha value chain. Our main breeding nursery and seed production facilities in Paraguay represent essential components of our breeding program.

For the time period from January to May 2018, we are looking for an intern for our affiliate in Paraguay with the following responsibilities:

- Performing emasculation, pollination and harvest activities in our breeding nursery to create new experimental seeds
- Supporting of field activities such as field inspections, data collection, leaf sampling etc.
- Supporting seed storage organization and quality testing

Applicants should have the following qualifications:

- Fitness for the tropics
- Student or bachelor degree in agriculture, horticulture or forestry
- Good German or English communication skills will be mandatory
- Basic Spanish communication skills will be helpful
- A driver's license will be helpful
- Commitment to proactive and responsible behavior
- Ability to work well in a team based environment

The position will be located in Volendam (Dept. San Pedro, Paraguay). Accommodation and catering will be provided.

If you feel addressed, please send your application (including letter of motivation, CV, certificates, references etc.) to office@jatrosolutions.com.
