

Promotion: Chuta® Plantations 2019

Chuta® is a high protein nut which serves as an innovative vegetable protein source. Since Chuta® is low sodium and sugar, and has high contents of unsaturated fatty acids, it contributes greatly to a healthy and balanced diet. In 2020 JatroSolutions will capture the European market with Chuta® as a superfood. Considering the current consumption trends of healthy and low carb diets, an enormous Chuta® demand is expected in the upcoming years.

For the establishment of the worldwide first Chuta® plantations, we offer highly attractive conditions:

Special offer to FrontRunners of Chuta®

- Promotional price of our top quality „Edible-Nut“ seeds
- Guaranteed purchase price for Chuta® harvest (seeds)
- Free on-site consultancy of our Chuta® expert at the beginning of plantation
- Free “Distance-Service-Package”
- Free “Location Suitability Assessment” (e.g. evaluation of climatic conditions and soil data)
- Free provision of general information about food export into the EU
- Free advertisement in the official JatroSolutions website
- Right of first refusal in order to expand their plantations in the upcoming years (competitive advantage for future increasing demands of Chuta®)

Advantages of growing Chuta®

- Perennial shrub with about 15 years of full yield potential: A one-time investment of Edible nut seeds (from JatroSolutions) provides minimum 15 years of Chuta® harvest
- The multiannual nature of the Chuta® plant as well as its drought tolerance and its robustness, enables Chuta® to cope with unfavourable climatic conditions
- Chuta® as a suitable plant for intercropping systems

Requirements:

- Area of cultivation: Minimum 50ha
- Suitable climate for the cultivation of Chuta®
- Cultivation in accordance with the guidelines of the EU is obligatory
- Relevant expertise in agriculture and post-harvest and quality management
- Required infrastructure for post-harvest management (dehusking, drying, storage as well as packaging) has to be available on the farm

Desirable:

- Large-scale farmers for the expansion of Chuta® fields in the upcoming years
- Expertise in high quality cultivation as well as in exporting food into the EU
